Adam DiMaio

Mechanical Engineer

United States +1 (702) 954-2032 adam.dimaio@outlook.com Adam DiMaio

Summary

I am a graduating Mechanical Engineer (May 2025) with expertise in Mechanical Design, FEA, CAD, and Manufacturing, seeking a role to apply my technical skills and problem-solving mindset to solve real-world challenges.

Education

Utah Tech University **August 2021 - May 2025**
Mechanical Engineering, BS

Current Projects

3U CubeSat **August 2024 - May 2025**

- Currently working in a team of 4 on the Communications Team of the CubeSat
- Responsible for parts of the Antenna Module Design, parts of the Earth Station Design, FCC Regulations, Manufacturing Components/Plans

Professional Experience

Utah Tech University **August 2022 - May 2024**
Research & Development Scholar St George, UT

- Participated in the National Science Foundation funded INSPIRE program, which creates opportunities for students to solve real-world problems in small, interdisciplinary groups.
- Worked within a group consisting of two Biology Majors and a Computer Science Major on creating a Proprietary Wearable Medical Device.
- Used CAD, Coding, and Prototyping to create an innovative solution to help knee reconstruction surgery patients try and regain full range of motion faster.

Brightline West **May 2023 - July 2023**
Summer Associate Las Vegas, NV

- Worked with the Design of Infrastructure Team on the pioneering project of introducing the first High-Speed Train system in the United States.
- Worked alongside Rolling Stock, Systems, and Maintenance Engineers to ensure a comprehensive project approach.
- Assisted Rolling Stock Engineer in optimizing platform design, train dimensions, and layout for optimal performance and safety.
- Collaborated with Systems Engineers to strategically position substations and design the layout of transmission lines for efficient power distribution.
- Produced a comprehensive document outlining the Rail Neutral Temperature, a critical factor for the Maintenance of Way Engineer in ensuring safe and reliable railway maintenance.
- Developed a Train Simulation Document utilizing Microsoft Excel to visually illustrate train departure and arrival times, optimizing the scheduling and operation of the high-speed trains.

Brightline West **June 2024 - July 2024**
Intern Las Vegas, NV

- Researched, Analyzed, and Translated Technical Knowledge and Key Points of the Code of Federal Regulations (CFR) for a White Paper Document.
- Created a detailed Hazard Log Analysis of Operations and Management Risk for Passengers and Staff During the Operational Phase of the High-Speed Railway.
- Collaborated in the Creation of a Contractor Integration Matrix that represented the Interface Control Documents between Contractors.
- Reviewed Certain Criteria from Engineering Drawings of the Track and Highway to Determine and Mitigate Associated Risks.

Certifications

FE Mechanical Exam — **February 2025**
NCEES
Badge

Skills

Computer Aided Design (CAD) & Manufacturing (CAM) Software
●●●●●
AutoCAD, OnShape, SolidWorks, Civil 3D, FreeCAD, Autodesk Fusion

Finite Element Analysis (FEA) Software
●●●●●
ANSYS Workbench, Simcenter Femap with Nastran

Fabrication/Manufacturing
●●●●●
CNC Machining/Operations, Laser Cutting, Waterjet, 3D Printing, Manual Mill, Manual Lathe

Programming
●●●○○
MATLAB, Arduino, C++

Microsoft Office Suite
●●●●●
Excel, Word, PowerPoint, Teams, Visio

Interdisciplinary Collaboration
●●●●●

Followed Codes/Regulations
●●●●●
MIL-STD-461F, ASCE 7-16, NASA-STD-6016, HIPAA Compliance, ANSI HE75:2009, FDA Guidelines, IP65

Past Projects

Mini Electronic Golf Course — **Jan - Apr 2022**
National Parks

- Used a Laser Trip to Ignite a Fog Machine using Arduino to Code
- Collaborated and worked within a group of 6 other engineering students

Arcade Game — **Jan - Apr 2023**
Excalibur

- Collaborated in a group of 5 engineering students
- Coded with Arduino to combine states of the Arcade game, also did certain aspects of the design, 3D printing, and laser cutting

Electronic Motor Boat — **Jan - Apr 2024**
Paddle Prodigies

- Collaborated in a group of 5 (4 Mechanical and 1 Electrical Engineering Students)
- Tasked with creating the Propulsion System (Propeller & Rudder) using Fluid Mechanics, Finite Element Analysis, and Machinery
- Achieved about 218.62 N of Thrust Force on the Propeller

Interests

Weightlifting

Product Creation

Nikola Tesla

Traveling
