<b>Education</b>	<b>Utah Tech University</b> Mechanical Engineering, BS GPA: 3.44	<b>August 2021 – May 2025</b>
<b>Professional Experience</b>	<b>Utah Tech University</b> 3U CubeSat: Communications Mechanical Engineer <ul style="list-style-type: none"><li>• Worked in an Interdisciplinary Group of 4 on creating a reliable Uplink/Downlink Communication System for our CubeSat.</li><li>• I specialized in R&amp;D, Mechanical Design, CAD, and Manufacturing all the Mechanical Components on the Antenna Module.</li><li>• Worked closely with the Electrical Engineers in ensuring the Mechanical Components on the Antenna Module and the Earth Station integrate with the Electrical Components</li></ul>	<b>August 2024 – May 2025</b> St. George, UT
	<b>Brightline West</b> Intern <ul style="list-style-type: none"><li>• Researched, Analyzed, and Translated Technical Knowledge and Key Points of the Code of Federal Regulations (CFR) for a White Paper Document.</li><li>• Created a detailed Hazard Log Analysis of Operations and Management Risk for Passengers and Staff During the Operational Phase of the High-Speed Railway.</li><li>• Collaborated in the Creation of a Contractor Integration Matrix that represented the Interface Control Documents between Contractors.</li><li>• Reviewed Certain Criteria from Engineering Drawings of the Track and Highway to Determine and Mitigate Associated Risks.</li></ul>	<b>June 2024 – July 2024</b> Las Vegas, NV
	<b>Brightline West</b> Summer Associate <ul style="list-style-type: none"><li>• Worked with the Design of Infrastructure Team on the pioneering project of introducing the first High-Speed Train system in the United States.</li><li>• Assisted Rolling Stock Engineer in optimizing platform design, train dimensions, and layout for optimal performance and safety.</li><li>• Collaborated with Systems Engineers to strategically position substations and design the layout of transmission lines for efficient power distribution.</li><li>• Produced a comprehensive document outlining the Rail Neutral Temperature, a critical factor for the Maintenance of Way Engineer in ensuring safe and reliable railway maintenance.</li><li>• Developed a Train Simulation Document utilizing Microsoft Excel to visually illustrate train departure and arrival times, optimizing the scheduling and operation of the high-speed trains.</li></ul>	<b>May 2023 – July 2023</b> Las Vegas, NV
	<b>Utah Tech University</b> Research & Development Scholar <ul style="list-style-type: none"><li>• Participated in the National Science Foundation funded INSPIRE program, which creates opportunities for students to solve real-world problems in small, interdisciplinary groups.</li><li>• Worked within a group consisting of two Biology Majors and a Computer Science Major on creating a Proprietary Wearable Medical Device.</li><li>• Used CAD, Coding, and Prototyping to create an innovative solution to help knee reconstruction surgery patients try and regain full range of motion faster.</li></ul>	<b>August 2022 – May 2024</b> St George, UT
